

JAISALMER WATER SUPPLY INTERVENTION

Jaisalmer was depending on canal water from Mohangarh for drinking water through worn out AC pipe line. After intervention of RUIDP, supply frequency has been improved from 1 hour has 1 hour in 2 days. This has resulted in service level improvement from 90LPCD to 135LPCD.

Water availability improved from 8MLD to 13 MLD. Increase in availability of water through laying of DI pipe transmission line and distribution pipe lines, replacement of pumping machinery and construction of Pumping station. RUIDP has also built 3 new ESRs to connect new areas and cover 26 distribution zones.
