

Construction of 2 Nos high level bridge on river Gambhiri & Bedach in Chittorgarh

National Highway 76 (NH-76) crosses river Gambhiri and river Bedach at different locations at Chittorgarh. Earlier, there exists 2-lane bridges over river Gambhiri and river Bedach without footpath exist and heavy traffic on NH-76 creates congestion over existing bridges and its approaches. In peak hours the traffic over above two bridges creates chaotic situation due to mixing of local slow & motorized traffic, through National Highway traffic and pedestrians. Besides the above, congestion over above two bridges were becoming worse day by day due to enormous growth of 2-wheelers and car/jeep/taxi. To avoid congestion, extension of existing 2-lane bridges with footpath for pedestrians over river Gambhiri and river Bedach and its approaches was done. The subproject, after implemented, benefited the population of town as well as through traffic of NH-76 with safe travel time & fuel consumption. The following is the key outcomes from the Subproject:

- a. Predominant traffic served
- b. Avoid any accident
- c. Saving of time
- d. Fuel saving
- e. Traffic congestion eased
- f. Social & Environmental hazards improved
- g. No psychological obstruction
